SWING STUMP GRINDER

http://tiny.cc/swingstumpgrinder

FEATURES & BENEFITS

- **Excellent visibility of the cutting area**
- **Cuts large stumps without repositioning**
- **Replaceable teeth**
- **Equipped with a rubber cover – prevents wood waste from flying on the around.**

The hydraulically powered stump grinder is a necessary tool for landscaping and forestry works. This unit hydraulically sweeps side to side effectively grinding the stump as deeply under ground as needed. It is equipped with a hydraulic oscillation system that moves the disc to the right and left to mill large logs.
The stump grinder is safely controlled from MultiOne's operator's seat. The solid steel cutter wheel and heavy duty replaceable teeth assure long lasting cutting performance. The stump grinder is also equipped with mechanical support legs which lift it off the ground for storage.
