

# NEW LIGHT MATERIAL BUCKET

## FEATURES & BENEFITS

- New efficient design increases volume and visibility
- Design to improve transport optimization
- Great resistance

The new design of the MultiOne bucket increases the volume and enables good visibility. The inside of the bucket is completely plain and the sides open forward in slight angle which guarantees easy and complete filling and emptying of all kinds of materials. The special design allows to stack the buckets one inside the other saving storage space (until 6 on a pallet).

The bottom of a light material bucket is considerably longer and the sides are higher than on a general bucket, which speeds up the work a lot. High back of the bucket prevents material from falling over the rear edge and guarantees high volume.
