

MANURE FORK

FEATURES & BENEFITS

- Simple design
- Strong, replaceable teeth
- Designed for excellent visibility from the operator's seat

The manure fork is designed to easily handle loose materials like hay, straw, manure or animal bedding. The simple design promotes easy handling of manure. The strong teeth, made of high tensile forged steel, penetrate also into compacted manure and can carry a heavy load.

When worn, the fork teeth are quickly and easily replaced. Two models with different teeth lengths are available.
