

DOZER BLADE

FEATURES & BENEFITS

- Rugged design delivers maximum uptime
- Dozer blade can be angled 30 degrees left and right

The MultiOne dozer blade can be angled from the driver's seat, either on the right or on the left, thanks to a sturdy hydraulic cylinder. It is equipped with two adjustable back shoes to set the working depth. It can be used for a wide variety of jobs, from scraping hard soils, to grading and stacking loose soils, quick and easy. An ideal tool for projects from rough construction through fine landscaping. Thanks to the excellent traction and the high pushing force of the MultiOne machines, it can also be used for heavy-duty earthmoving jobs.

It must not be used for snow removal along roads and parking lots (in this cases must be used the snow plow or snow blade).
