

# LANDSCAPE POT CLAMP

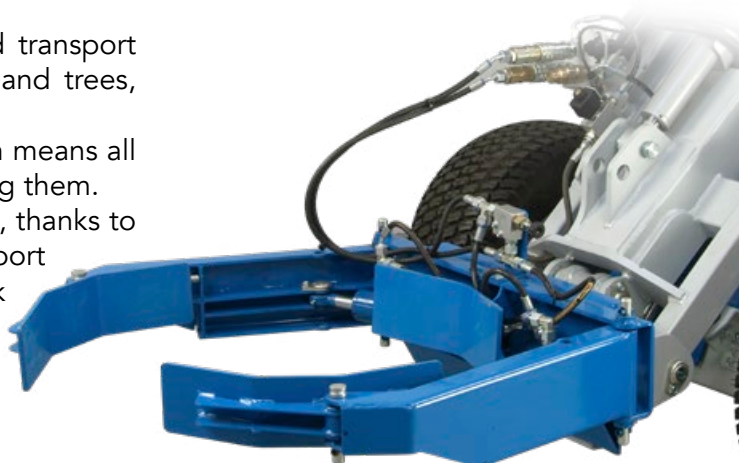

## FEATURES & BENEFITS

- The easiest way to lift and transport potted or balled plants, trees, barrels, and more without causing damage.
- Excellent tool for nurseries and landscapers

The MultiOne pot clamp is designed to lift and transport round objects, such as potted or balled plants and trees, barrels, and more without causing damage.

Grabbing force can be adjusted by a valve, which means all kinds of objects can be handled without damaging them.

It is the ideal attachment for the nurseryman who, thanks to the small size of the Multione machine, can transport both the plant pots and the machine on the truck or trailer to make the unloading at the delivery place simply and quickly.
