

# SNOW PLOW

<http://tiny.cc/snowplow1>

## FEATURES & BENEFITS

- Rugged professional grade snow plow
- 5 configurations
- Two independent controllable blades: can be adjusted in straight, V or Y position
- Advanced optional floating system allows working on uneven surfaces as well

MultiOne snow plow is a versatile attachment for snow removal. It consists of two independent hydraulically adjustable blades. Angle of the blades can be adjusted from the driver's seat. 5 different blade operating positions:

1) 30° right - 2) 30° left - 3) Straight - 4) Scoop "Y" - 5) V-plow. It is equipped with shock absorbing springs that allow the blade to trip forward when an obstacle is encountered. The optional floating system on the mounting bracket guarantees that blade follows the ground as well as possible. Support legs are standard while the extension wings are optional; both increase the blade width.

**Note: the floating boom valve on the machine is suggested.**
